BASICS-PQ-LIMS-28

Script Title	Stability Spec Ex Review / Approval workflow, Stability Study Report and workflow, Sample Pull Details, and completion of Timepoints (Virtual Vault)

Test Script ID	BASICS-PQ-LIMS-28	**Title**	Stability Spec Ex Review / Approval workflow, Stability Study Report and workflow, Sample Pull Details, and completion of Timepoints (Virtual Vault)
Description	Verify: 1) The Stability Spec Execution review & approval workflow 2) A user can generate a stability study report mid-study 3) The stability study report formatted output 4) The stability report document workflow 5) Sample Result Entry for a stability sample 6) The sample pulled date workflow 7) Runtime stability trending		
Vault Name	ClinicalBasicsAutomation26R1	**Product Version**	26R1
V-Assure Environment	Spotline: V-Assure Development	**Run Number**	
Start Time	07-JUL-2026 17:58:31 GMT-07:00	**End Time**	07-JUL-2026 21:32:44 GMT-07:00
Pre-Test Setup (PTS)	1. Ensure the following Test Accounts are available and record the usernames of the accounts: - USER1 (Security Profile: LIMS User, LIMS Roles: Stability Design & Study Admin): stab.admin1@vaultbasics-automation.com - USER2 (Security Profile: LIMS User, LIMS Roles: Stability Approver): stab.app1@vaultbasics-automation.com - USER3 (Security Profile: LIMS User, LIMS Roles: Results Entry): re1@vaultbasics-automation.com - USER4 (Security Profile: LIMS User, LIMS Roles: Stability Design & Study Reviewer): stab.rev1@vaultbasics-automation.com 2. The following Test Definitions are in the Effective state and each have a numeric result definition. TD1: TD1_L28_83819193 TD2: TD2_L28_20910650 3. Release Batch BATCH1 exists with an Approved Release Spec Execution. The Batch has a Manufacturing Site, an Expiration Date and a Manufacture Date (these dates are not the same value, the Manufacture Date is at least 5 months in the past). The Spec Execution has 2 tests, one corresponding to TD1 and one corresponding to TD2. Each test has a Criteria Evaluation (release limit) record with Purpose = COA, Stability Study Report, and Indication = Out of Specification. BATCH1: BATCH1_PTS3_L28_67968393 4. The following Sample Plans are Effective: SP1 has 1 sample definition with Sample Type = Stability SP2 has 2 sample definitions, each with Sample Type = Stability. Each sample definition has a unique Storage Condition, one of the Storage Conditions is the same as the value on the sample definition of SP1.		

SP1: SP1_PTS4_L28_78788640
SP2: SP2_PTS4_L28_83758443

5. SD1 is a stability Spec Data in the Effective state with sample plan SP1.

   SD1 has the following:
   1) A sample to test
   2) 2 tests to execute (one with Test Definition = TD1, and one with Test Definition = TD2)
   3) Each test to execute has a Specification Criteria record with Purpose = Stability Study Report, and Indication = Out of Specification.

   *The criteria description match those on the spec data associated to the BATCH1 spec execution.

   SD1: SpecData1_PTS5_L28_71368390

6. SD2 is a stability Spec Data in the Effective state with sample plan SP2.

   SD2 has the following:
   2 samples to test (one for each sample definition)

   Each sample to test has:
   1) 1 test to execute (one sample to test has Test Definition = TD1, the other sample to test has Test Definition = TD2)
   2) Each test to execute has a Specification Criteria record with Purpose = Stability Study Report, and Indication = Out of Specification.

   *The criteria description match those on the spec data associated to the BATCH1 spec execution.

   3) 2 regression trend chart definitions; one for each of the criteria records above. Populate the fields as follows:
   *Default Regression Type = Linear
   *Default Confidence Level = 95

   SD2: SpecData2_PTS6_L28_04267002

7. STUDY1 is a lab study in the In Progress state.
   The following fields are populated in the Details section:
   Study Name (STUDY1)
   Batch (BATCH1)
   Start Date (set to a date in the past, at least 4 months before the current date)
   Shelf Life = 3
   Shelf Life Units = Months

   The Owner field is populated with an Active user.

   The STUDY1 timepoints are as follows:

   1) T0
   Time Stored = 0
   Time Stored Units = Days
   Spec Data = SD1
   Lifecycle state = Complete (the corresponding Spec Execution is Approved)

	2) 2 months Time Stored = 2 Time Stored Units = Months Spec Data = SD2 Lifecycle state = Initiated (the corresponding Spec Execution is Testing Complete) 3) 3 months Time Stored = 3 Time Stored Units = Months Spec Data = SD1 Lifecycle state = Initiated (the corresponding Spec Execution is in the Not Started state) 4) 14 days Time Stored =14 Time Stored Units = Days Spec Data = SD2 Lifecycle state = Complete (the corresponding Spec Execution is Approved) STUDY1 was initiated using BATCH1 results (i.e., the corresponding initial/T0 spec execution has no samples, or tests) STUDY1: STUDY1_PTS7_L28_04438514 8. STUDY1 has two attachments that are images. One attachment (ATT1) has the Description populated and the other attachment (ATT2) does not have the Description populated. NOTE: include a screenshot of the attachment images. 9. Confirm that the Vault Token: Virtual Vault? = true 10. The Basics Customer record has the following field populated Company Logo NOTE: include a screenshot of the logo including the file name to ensure it is the same logo file attached on the Basics Customer record 11. A PDF file is available outside of vault (i.e., to be used for sample results transcription).

Step #	Procedure	Expected Results	Actual Results	Pass/Fail
1	Log into Vault as USER1. From the LIMS tab collection, navigate to Stability > Stability Studies. Locate and click into STUDY1.	STUDY1 is displayed and is in the In Progress state.	N/A	N/A
2	From the All Action menu of STUDY1, select Generate Stability Report.	A banner appears indicating Stability Report generation is in progress.	N/A	N/A
3	Wait until a notification appears (bell icon) indicating the Stability Study Report job completed successfully. Refresh the page for STUDY1. Expand the Stability Report section. This document will be referred to as DOC1.	DOC1 is listed with Status = Initial.	N/A	N/A
4	Click into DOC1. On each page of the document, verify that the header correctly displays the following: 1) Company Logo (from the Basics Customer record) 2) Stability Report for STUDY1	On each page of the document, the header correctly displays the following: 1) Company Logo (from the Basics Customer record) 2) Stability Report for STUDY1	N/A	N/A
5	Below the header on the first page, confirm the following information is correctly displayed with the correct values: Start Date Material Batch Manufacture Date Manufacturing Site	Below the header on the first page, the following information is correctly displayed with the correct values: Start Date Material Batch Manufacture Date Manufacturing Site	N/A	N/A
6	Below the Manufacturing Site field, confirm there are Results tables per each condition & orientation combination. Confirm each table has a column for the following timepoints: Initial, 14 days.	Below the Manufacturing Site field, there are Results tables per each condition & orientation combination. Each table has a column for the following timepoints: Initial, 14 days.	N/A	N/A
7	Below the Results tables, confirm there is a Results Legend with a row for Blank cell, and a row for "- -".	Below the Results tables, there is a Results Legend with a row for Blank cell, and a row for "- -".	N/A	N/A

Step #	Procedure	Expected Results	Actual Results	Pass/Fail
8	Below the Results legend, confirm ATT1 and the Description are displayed in the Attachments section.	Below the Results legend, ATT1 and the Description are displayed in the Attachments section.	N/A	N/A
9	On each page of the document, verify that the footer correctly displays the following: Report Date CONFIDENTIAL Page X of Y	On each page of the document, the footer correctly displays the following: Report Date CONFIDENTIAL Page X of Y	N/A	N/A
10	From the Workflow & State change icon of DOC1, select Send for Approval. Click into the dropdown for the Approver field.	USER1 is not listed in the Approver dropdown.	N/A	N/A
11	Select USER2 for the Approver and click Start.	DOC1 moves to the In Review state.	N/A	N/A
12	Log into Vault as USER2. From the Notifications (bell icon) confirm there is a task notification for "Approve Stability Report".	There is a task notification for "Approve Stability Report".	N/A	N/A
13	Click the link to open DOC1. Click Complete in the taskbar. Select the Return for Edits verdict and enter a Reason for return. Click Complete.	The workflow ends and DOC1 is in the Initial state.	N/A	N/A
14	Log into Vault as USER1. From the notifications icon confirm there is a notification indicating DOC1 requires attention	There is a notification indicating DOC1 requires attention	N/A	N/A

Step #	Procedure	Expected Results	Actual Results	Pass/Fail
15	Navigate to STUDY1 and click the pencil icon to edit. Populate the following fields (all with unique values): Study Type Description Organization Additional Information Intro Text Conclusion Text Click save.	The fields are populated with unique values, and the record is saved.	N/A	N/A
16	From the All Action menu of STUDY1, select Generate Stability Report. Wait until a notification appears (bell icon) indicating the Stability Study Report job completed successfully. Refresh the page for STUDY1. Expand the Stability Report section. Click into DOC1.	The DOC1 minor version has increased.	N/A	N/A

Step #	Procedure	Expected Results	Actual Results	Pass/Fail
17	Confirm that this version of DOC1 is the same as the previous version of DOC1 except for the following changes and the values are correct: 1) Below the header, the following fields appear: Study Type Study Description Start Date* Organization Material* Batch* Manufacture Date* Manufacturing Site* Additional Information *Indicates fields that were present on the previous version of DOC1 2) Below the Additional Information field, the text from the Intro Text field is displayed 3) Below the Results Legend, the text from the Conclusion Text field is displayed 4) The Report Date is updated NOTE: number of pages may also be different	This version of DOC1 is the same as the previous version of DOC1 except for the changes listed, and the values are correct.	N/A	N/A
18	From the Workflow & State change icon of DOC1, select Send for Approval. Select USER2 for the Approver and click Start.	DOC1 moves to the In Review state.	N/A	N/A
19	Log into Vault as USER2. Navigate to the Home tab and click on All Tasks. Click the task link to open DOC1. Click Complete in the taskbar. Select the Approve verdict, select an Electronic Signature Meaning, and complete the e-signature. Click Complete.	DOC1 moves to the Final state and the version is major (e.g., 1.0).	N/A	N/A
20	From the All Actions menu of DOC1, select Download Viewable Rendition. Open the downloaded file.	The viewable rendition of DOC1 includes the e-signature from the previous step.	N/A	N/A

Step #	Procedure	Expected Results	Actual Results	Pass/Fail
21	Log into Vault as USER3. From the LIMS tab collection, navigate to Stability > Stability Studies. Locate and click into STUDY1. Expand the timepoints section. Click into the Spec Execution link for the 2 month timepoint. Click into the Trend Charts Summary section and click the button (x Charts With Alerts).	The Trend Charts Page is Displayed for the 2 month spec execution record. A trend chart is displayed.	N/A	N/A
22	Change the Confidence Level to 99 and click apply.	The Trend Chart updates.	N/A	N/A
23	From the LIMS tab collection, navigate to Stability > Stability Studies. Locate and click into STUDY1. Expand the timepoints section. Click into the Spec Execution link for the 3 month timepoint. Expand the samples section. NOTE: the sample will be referred to as SPL1.	The Spec Execution is in the Not Started state. SPL1 is the only sample and it is in the Not Started state.	N/A	N/A
24	Click into SPL1. From the All Actions Menu, select Record Pulled Date.	The Start Workflow Dialog appears.	N/A	N/A
25	Populate the Pulled date with the current date and populate the Pull Compliance Comments. Click Start. Expand the Pull Details section.	Pulled Date = current date Pull Compliance = Late	N/A	N/A
26	From the All Actions menu of SPL1, select launch Sample Result Entry. Click Continue.	Sample Result Entry opens for SPL1.	N/A	N/A

Step #	Procedure	Expected Results	Actual Results	Pass/Fail
27	Click on the Upload Document icon. Select the PDF file as outlined in the Set Up steps. Click Open. Click the View Related Document icon.	The document is displayed on the right hand side of Sample Result Entry.	N/A	N/A
28	Enter result(s) for SPL1. Click the Evaluate button.	The test result(s) are entered. The result cell(s) are no longer editable.	N/A	N/A
29	Click Verify and then Complete.	The Spec Execution is displayed. The Spec Execution is in the Testing Complete state. SPL1 and the Test(s) are in the Testing Complete state.	N/A	N/A
30	Click the edit pencil icon and populate the Stability Report Comment field with "3 month timepoint testing outsourced". Click Save.	The Stability Report Comment field is populated with "3 month timepoint testing outsourced".	N/A	N/A
31	Navigate to Stability > Timepoints (Spec Executions). Filter by Lifecycle state = Testing Complete and Study = STUDY1	Two spec executions are displayed.	N/A	N/A
32	From the All Actions menu, select Start Workflow. Select Spec Execution: Review / Approval and click Continue. Hover over the Stability Approver participant.	USER1 is not listed.	N/A	N/A
33	Click Start. Click into one of the Spec execution records. Click the link for the multi-record workflow. NOTE: the envelope will be referred to as ENV1.	ENV1 is displayed. Each of the Spec executions are in the In Review state.	N/A	N/A
34	Log into Vault as USER2. From the notifications confirm there is notification to Complete Task: Stability Review of Spec Execution for the two records.	There is notification to Complete Task: Stability Review of Spec Execution for the two records.	N/A	N/A

Step #	Procedure	Expected Results	Actual Results	Pass/Fail
35	Navigate to the Home tab. Click the link to open ENV1. Click Accept in the task bar. Then click Complete. Select the Return for Edits verdict and populate the Reason for return. Click Complete.	The workflow ends/ is Completed. Both Spec executions are in the Testing Complete state.	N/A	N/A
36	Log into Vault as USER3. From the notifications confirm there is a notification that Spec Execution Review/ Approval requires attention for the two records.	There is a notification that Spec Execution Review/Approval requires attention for the two records.	N/A	N/A
37	Navigate to Stability > Timepoints (Spec Executions). Filter by Lifecycle state = Testing Complete and Study = STUDY1	Two spec executions are displayed.	N/A	N/A
38	From the All Actions menu of the 2 month timepoint, select Send for Review / Approval. Click Start.	1 spec execution record is displayed.	N/A	N/A
39	From the All Actions menu of the 3 month timepoint, select Send for Review / Approval. Click Start.	No spec execution records are displayed.	N/A	N/A
40	Log into Vault as USER2. Navigate to the Home tab > All Tasks. Click the task link to open the 2 month Spec Execution. Click Accept in the task bar. Then click Complete. Select the Reject Spec Execution verdict, enter a Rejection Reason, select an Electronic Signature Meaning, and complete the e-signature. Click Complete.	The workflow ends/ is Completed. The Spec Execution is in the Rejected state. All Samples are in the Rejected state. All Tests are in the Rejected state.	N/A	N/A

Step #	Procedure	Expected Results	Actual Results	Pass/Fail
41	Navigate to the Home tab > All Tasks. Click the task link to open the 3 month Spec Execution. Click Accept in the task bar. Then click Complete. Select the Approve Spec Execution verdict, select an Electronic Signature Meaning, and complete the e-signature. Click Complete.	The workflow ends/ is Completed. The Spec Execution is in the Approved state. The Sample is in the Approved state. All Tests are in the Approved state.	N/A	N/A
42	Log into Vault as USER1. From the LIMS tab collection, navigate to Stability > Stability Studies. Locate and click into STUDY1. Expand the Timpoints section. Ensure the "Exclude from Stability Report?" field is visible.	STUDY1 is in the Timepoints Complete state. All Timepoints are in the Complete state. The 2 months timepoint has "Exclude from Stability Report?" = Yes. The field is No for all other timepoints.	N/A	N/A
43	Expand the Stability Report section.	DOC1 is listed with Status = Initial.	N/A	N/A
44	Click into DOC1. Confirm that this version of DOC1 is the same as the previous version of DOC1 except for the following changes: 1) The results tables now include the 3 Months timepoint. 2) Below the Results legend, the 3 Months timepoint is listed with the comment "3 month timepoint testing outsourced 3) The Report Date is updated NOTE: number of pages may also be different	This version of DOC1 is the same as the previous version of DOC1 except for the changes listed.	N/A	N/A
45	Navigate back to STUDY1 and expand the Timepoints section. From the all actions menu of the 14 Days Timepoint, select "Update Exclude from Stability Report to Yes". Click Start.	Exclude from Stability Report? = Yes for the 14 Days Timepoint.	N/A	N/A
46	From the all actions menu of the 14 Days Timepoint, select "Update Exclude from Stability Report to No". Click Start.	Exclude from Stability Report? = No for the 14 Days Timepoint.	N/A	N/A
