BASICS-QA-LIMS-06

Script Title	Design Data Loader (Virtual Vault)

Test Script ID	BASICS-QA-LIMS-06	Title	Design Data Loader (Virtual Vault)
Description	Verify that a user can export design data. Verify that a user can import design data records.		
Vault Name	ClinicalBasicsAutomation26R1	Product Version	26R1
V-Assure Environment	Spotline: V-Assure Development	Run Number	
Start Time	04-JUL-2026 07:32:23 GMT-07:00	End Time	04-JUL-2026 11:13:08 GMT-07:00

Pre-Test Setup (PTS)

1. VAULT1 is a LIMS Basics vault with Vault Token: Virtual Vault? = true

   Record the vault ID as VAULT1: 347637

2. VAULT2 is a LIMS Basics vault with Vault Token: Virtual Vault? = true

   Record the vault ID as VAULT2: 352247

3. Ensure the following Test Accounts are available in both Vaults (i.e., domain users) and record the username of the accounts:
   - USER1 (Security Profile: LIMS Design Data Admin, LIMS Roles: none): dda04@vaultbasics-automation.com
   - USER2 (Security Profile: LIMS User, LIMS Roles: Stability Design & Study Admin): stab.admin1@vaultbasics-automation.com

4. Lab Result Picklist exists in both vaults and has at least two entry options/values.

   Record the Picklist name as PL1.

   PL1: Pass / Fail

5. An Effective Test Definition (TD1) exists in VAULT1 with the following setup:

   1) 5 result definitions, one of each type of result (numeric, text, picklist, date, date/time). The numeric result definition has a unit defined as well as LOD, LOQ, and uLOQ values. The Picklist result uses PL1.
   2) A test definition variation (VAR1). The variation has a variation result for each of the 5 result definitions (5 variation results).

   NOTE: TD1 does not exist in VAULT2.

   Include screenshots of TD1 showing all setup indicated above.

   TD1: LIMSI-06-TD44388644
   VAR1: lab result picklist-LIMSI-06-Correct_Variation

6. Two External Organization records exist in both VAULT1 and VAULT2 and are in the initiated state.

   Record the names as ORG1 and ORG2.

ORG1: Organization173564861
ORG2: Organization293450742

7. An Effective Sample Plan (SP1) exists in VAULT1 with the following setup:

   1) Two sample definitions, each with a Testing Laboratory defined (ORG1 and ORG2)

   NOTE: SP1 does not exist in VAULT2.

   Include screenshots of SP1 showing all setup indicated above.

   SP1: LIMSI-06-SP189233523

8. An Effective Release Spec Data (SD1) exists in VAULT1 with the following setup:

   1) Sample Plan = SP1
   2) Two samples to test, one for each sample definition record
   3) Each sample to test has a Test to execute record with Test Definition = TD1 and Variation = VAR1.
   4) There are 4 spec data criteria records; each test to execute has a release criteria (indication = out of specification) and a control criteria (indication = alert). NOTE: the out of specification must be on the numeric result.
   5) There are two trend chart definitions; one for i chart and one for MR chart.

   NOTE: SD1 does not exist in VAULT2.

   Include screenshots of SD1 showing all setup indicated above.

   SD1: LIMSI-06-SD183951681

9. An Active Storage Condition record exist in both VAULT1 and VAULT2.

   Record the name as SC1.

   SC1: LIMS-06 Storage Condition

10. An Effective Sample Plan (SP2) exists in VAULT1 with the following setup:

    1) One sample definition with sample type = Stability and Storage Condition = SC1.

    NOTE: SP2 does not exist in VAULT2.

    Include screenshots of SP2 showing all setup indicated above.

    SP2: LIMSI-06_SP253853875

11. An Effective Stability Study Spec Data (SD2) exists in VAULT1 with the following setup:

    1) Sample Plan = SP2
    2) One sample to test.
    3) The sample to test has a Test to execute record with Test Definition = TD1 and Variation = VAR1.

	4) There are 2 spec data criteria records; a release criteria (indication = out of specification) and a control criteria (indication = alert). NOTE: the out of specification must be on the numeric result. 5) There is a regression trend chart definition. NOTE: SD2 does not exist in VAULT2. Include screenshots of SD2 showing all setup indicated above. SD2: LIMSI-06-SD175256056
